## Professional Summary

---

Product-focused professional specialising in AI-driven workflow automation and LLM-based systems. Built an end-to-end recruitment automation product, reducing screening effort and improving decision speed. Strong in product thinking, experimentation, and translating business problems into scalable AI solutions.

## EDUCATION

---

<b>Product Management &amp; Agentic AI</b> <i>Vishlesan i-Hub, IIT Patna</i>	07/2025 – 02/2026 Remote
<b>Master of Technology (Water Resources Engineering)</b> <i>Veer Surendra Sai University of Technology</i>	09/2022 – 05/2024 Sambalpur, Odisha
<b>Bachelor of Technology (Civil Engineering)</b> <i>Government College of Engineering</i>	08/2018 – 07/2022 Kalahandi, Odisha

## SKILLS

---

**Product Management** – Backlog Management, Risk Mitigation, Stakeholder Alignment, Product Analytics, A/B testing, Growth Metrics, Dependency Management, AI workflow Automation, AI use Case Design

**Technical Skills** – Python, Agentic AI, Jira, Figma, Miro, wireframing, RAG & LLM, SQL, MS Office

**Strategy & Research** – Agile/Scrum, User Research, Data-Driven Decision Making, PRD writing, Technical Feasibility Analysis, Cross-Functional Execution

**Soft Skills** – Stakeholder Communication, Problem-solving, Analytical Thinking, Cross-functional Teamwork

## Projects

---

### AI Resume Analyzer & Recruiter Automation System 🔗

Built an AI-powered recruitment automation system that reduced manual resume screening effort by ~70% by automating parsing, JD matching, and candidate scoring.

- Designed end-to-end workflow using n8n + GPT for resume parsing, scoring (0–100), and automated interview scheduling
- Improved decision accuracy by structuring LLM outputs using prompt engineering + rule-based validation
- Simulated real hiring workflow for SMEs handling 100+ resumes per role
- Reduced recruiter decision time from ~15 mins → <3 mins per candidate

Product Context:

- Target User: Talent Acquisition Manager at SMB tech companies
- Problem: High-volume resume screening causing slow hiring cycles and missed candidates
- Outcome: Automated screening + prioritization system improving hiring efficiency

### More Projects 🔗

## EXPERIENCE

---

### Radiant

11/2024 – 04/2025  
Bhubaneswar, Odisha

#### *Water Resources Designer*

- Led data-driven planning for urban drainage systems using rainfall and population datasets
- Built analytical models to forecast demand and optimize infrastructure planning
- Collaborated with cross-functional stakeholders to deliver large-scale engineering projects

## COURSES & CERTIFICATION

---

### Google cloud & AI certifications

07/2025 – 08/2025

- Prompt Design in vertex AI
- Build Real World AI Applications with Gemini and Imagen
- Explore Generative AI with the Gemini API in Vertex AI
- Develops GenAI Apps with Gemini and streamlit
- Inspect Rich Documents with Gemini Multimodality and Multimodal RAG

## ACHIVEMENT

---

Conference Paper in Hydro 2024

2024

Book chapter published in Springer [🔗](#)
